RE: Request to withdraw CCUS 1 Class VI permit application in Osage County

To Whom It May Concern:

CapturePoint Solutions LLC is submitting this letter to EPA Region 6 as a formal withdrawal, effective January 8th, 2025, of our CCUS 1 Class VI permit application in Osage County, Oklahoma that was filed September 17th, 2023.

After considering the concerns brought forward by the Region 6 technical team regarding our application, we have determined that the best path forward will be to withdraw the permit.

CapturePoint Solutions LLC will continue to evaluate the area for a geologic sequestration project by acquiring additional site-specific information before potentially re-filing in the future. We understand that a great deal of time and effort goes into reviewing these permits and we greatly appreciate the diligence and professionalism that is involved in these evaluations. We recognize that it is important to this nascent industry to ensure that each project that is approved meets a high standard.

We look forward to working with Region 6 as we develop our carbon management business.

Should there be any questions or if further clarification is needed, I can be reached at tevans@capturepointllc.com.

Sincerely,

Ronald T. Evans
