

FACT SHEET

<u>Applicant:</u>	RIVER PARISH SEQUESTRATION, LLC 1333 West Loop South, Suite 810 Houston, TX 77027 (832) 696-0052
<u>Project Proposal:</u>	Permit to drill, construct, and operate one Class VI Injection Well
<u>Well Name:</u>	RPN-1-INJ Well No. 001
<u>Project Location:</u>	Section 16, Township 11 South, Range 14 East Ascension Parish
<u>Facility Local Address:</u>	30°06'9.04" N, 91°03'45.37" W
<u>Application No.:</u>	45054
<u>Docket No.:</u>	UIC 2026-01

Project Summary: The following information is prepared according to the requirements of Statewide Order No. 29-N-6, (LAC 43:XVII, Subpart 6) to briefly set forth the principal facts and the significant factual, legal, methodological and policy questions considered in preparing a draft permit concerning an application by River Parish Sequestration, LLC (RPS) to drill, construct, and operate one Class VI injection well in Ascension Parish, Louisiana.

The application is for the drilling and operation of one proposed Class VI geologic sequestration (injection) well. The total depth of the well will be approximately 10,385 feet below ground level.

RPS proposes to inject up to approximately 2 million metric tons of carbon dioxide per year for an estimated 30 years.

General Information: RPS proposes to inject carbon dioxide for the purpose of geologic sequestration. The base of the lowermost underground source of drinking water (USDW) is approximately 590 feet below ground level. There are seven (7) registered water wells located within a one-mile radius of the proposed well location. The principal regional aquifers in the area are comprised of the confined Mississippi River Alluvial and Norco Aquifer.

The complete application consists of the application form (Form UIC-60 Class VI Well Permit application) and technical attachments describing the geology, hydrogeology, area of review, corrective action, well construction, completion, operation, testing and monitoring, emergency and remedial response, plugging and abandonment, post injection site care, closure plans, and financial responsibility for the proposed activity.

The draft permit conditions were based on applicable rules and regulations as set forth in Statewide Order No. 29-N-6 (LAC: 43:XVII, Subpart 6) as amended. Such rules provide for the protection

and non-endangerment of USDW regarding the permitting, drilling, completing, operating, and maintaining of Class VI injection well operations in the State of Louisiana.

Application Location: The application package is available for viewing on the Louisiana Department of Conservation and Energy website.

For information regarding the public hearing or any information concerning the application, refer to the Public Notice for Docket No. UIC 2026-01 or call Gavin Broussard at (225) 342-5515, Monday through Friday, between the hours of 8:00 a.m. to 4:30 p.m.

Comment Period: The public comment period officially commences December 18, 2025, at 8:00 a.m. and concludes January 30, 2026, at 4:30 p.m. Submit all comments in writing to Gavin Broussard, Office of Permitting and Compliance, Engineering Division, 617 N. 3rd St, Eighth Floor, Baton Rouge, LA 70802. Comments may also be e-mailed to info@la.gov. Please reference River Parish Sequestration, LLC – Class VI Permit – Docket No. UIC 2026-01.

Public Hearing: The Secretary will hold a public hearing for the purpose of receiving testimony, facts, or oral or written comments relevant to the Draft Permit. During this hearing, the hearing officer will only receive comments. The Department of Conservation and Energy will respond to all relevant comments in a written report after the conclusion of the public comment period.

The public hearing will be held in Ascension Parish at the Donaldsonville Courtroom West, 300 Houmas St., Donaldsonville, LA 70346 at 6:00 pm on January 29, 2026.
